

## 55m Quinta Essentia hits the water

The Italian Sea Group shipyard announced the launch of their latest superyacht, the 55m Quinta Essentia. The vessel represents the largest ever build by Admiral Yachts.

Dobroserdov Design styled her exterior, whilst Michela Reverberi Studio was responsible for the interior.

The all-aluminum Quinta Essentia can accommodate up to 12 guests over 6 generous staterooms, including a large owner's suite on the main deck, a VIP cabin with a 180 degree panoramic view on the upper deck, and 4 cabins on the lower deck. The owner and guests will get to enjoy a pool on the main aft deck plus a spa below decks. The spa contains a hammam, a sauna and a massage area.

Quinta Essentia was commissioned by a very experienced owner and features naval architecture from the renowned Vripack. She has a hybrid propulsion system that in combination with the construction technology allows for a silent, safe and exceptionally efficient cruising.

Powered by twin MAN engines, she reaches a maximum speed of 16.5 knots, with an impressive range of over 6,500 nm at a speed of 9.5 knots.
