

ADMIRAL

## Novi dragulj mora: Ouranos

Talijanski brodograditelj Admiral Yachts i njegov vlasnik, grupa Italian Sea Group, u posljednje vrijeme imaju više posla nego što stignu obaviti. Građen za naručitelja koji je ranije već posjedovao jedan model Admirala, novi projekt Admiral 'C Force' Ouranos od 50 metara konačno se našao na vodi. Istovremeno inovativan i tradicionalan, Ouranos spaja nautičku klasiku sa suvremenim dizajnom i građen je prema vrlo zahtjevnim specifikacijama. Jahta ima istisninski trup građen od aluminija i čelika, te je sa svojih 17 čvorova jedna od najbržih istisninskih jahta tih dimenzija. Unutrašnjost Admirala 50 m Ouranos luksuzna je na neočekivan način, gotovo suzdržana u tradicionalnim izrazima luksuza, profinjena u svakom detalju i udobna poput doma na vodi. Vlasnik namjerava provoditi vrijeme na jahti u obiteljskom krugu, no istovremeno je želio i smještaj za veći broj članova posade, što je detalj koji su dizajneri morali posebno imati na umu tijekom razrade rasporeda prostorija. Admiral je nedavno porinuo i jahtu Quinta Essentia, svoju najveću jahtu dosad. Ta 55 metara dugačka hibridna jahta neće dugo biti najdulji Admiral, jer kuća je već potpisala ugovor za gradnju jahte od 63 metra za jednog iskusnog vlasnika, koja će biti isporučena 2019.

## A new sea jewel 'Ouranos'

It is clearly a busy period for Admiral Yachts and for The Italian Sea Group in general. Built for a repeat Client and christened 'Ouranos', the Admiral 'C Force' 50 meter is finally on the water delivering a new and innovative touch in her range. 'Ouranos' is just the perfect balance between tradition and innovation, between classic and marine lines, and modern and advanced design, not to talk about the high specifications she has been built to. The yacht features a full displacement hull, with steel and aluminium construction, while delivering a maximum speed of 17 knots, which makes her one of the fastest displacement yachts of this size. The interiors of the yacht really create a new way for luxury, never too lavish but very refined, a true home away from home, thought to be comfortable while the Owners' family is on board, but also practical enough for the crew to work on board. Also, the outstanding 55 hybrid yacht called 'Quinta Essentia' was launched. It is the biggest yacht ever built by Admiral Yachts. This shipyard also signed a new build 63 m superyacht for highly experienced superyacht owner. This stunning new superyacht will be delivered in 2019.
