

Admiral E Motion 55m Motor Yacht QUINTA ESSENTIA Hits Water in Italy

March 25, 2016

[The Italian Sea Group](#) shipyard announced the launch of their 55m Admiral [motor yacht QUINTA ESSENTIA](#), which took place today. The vessel represents the largest ever constructed yacht by [Admiral Yachts](#), until the 75-metre currently under build is launched in 2018.

QUINTA ESSENTIA was commissioned by a very experienced Owner, with numerous well-known yachts under his ownership in the past. Quinta Essentia is an innovative vessel with technologically advanced features and, therefore, a low environmental impact when compared to other yachts of her size fitted with traditional propulsion.

Admiral E Motion 55 boast an advanced hybrid propulsion system which integrates two traditional engines with two electric motors, also connected to variable speed generators. The system is also fitted with two traditional transmissions with two shatts. The propulsion system in combination with the construction technology allows for a silent, sate and exceptionally etticient cruising.
