

Admiral C Force 50 superyacht *Ouranos* launched

4 April 2016 by Laura Nineham

Admiral has launched the first of its C Force 50 superyachts *Ouranos*, just days after *Quinta Essentia* was launched.

Ouranos is a full displacement superyacht built in steel and aluminium. With exterior design by UNIELLE Yacht Design, and an interior by Admiral Centro Stile, she exemplifies the new breed of luxury yachts from the yard.

The C Force 50 has generous interior volumes, despite measuring below the 500GRT mark. With space to accommodate 12 guests, she boasts a master suite located forward on the main deck, three double cabins and two twin cabins.

"I guess that *Ouranos*' interiors express the contemporary lifestyle state-of-the-art without being overcharged of hyper-decoration; 'Less is More' is still current," said Arch. Gian Marco Campanino, who designed the interior with Admiral Centro Stile.

"Without giving up high-end finishings, this yacht establishes a new luxury idea, made of purity and linearity. Sophisticated atmospheres and subtle colour shades make her interior something very cozy although definitely luxurious; precious materials and outstanding art pieces speak for themselves. Without being a glitzy boat, she best represents the new ideal of elegance".

With twin Caterpillar engines driving fixed pitch propellers, *Ouranos* is expected to reach a maximum speed of 15 knots and a cruising speed of 14 knots.

At a construction ceremony at the yard in October 2014, Italian Sea Group Vice President, Francesco Carbone said: "We are particularly proud to celebrate a new construction for an owner and a family we have known for years and with whom we have a true respectful relationship.

"Her unique design won't pass unnoticed in the most exclusive ports of the Mediterranean Sea and in the Caribbean from 2016."

The contract for the new build was sold by Cape4 Yachting in 2013.

The first C Force 50 will cruise the Mediterranean this summer ahead of her debut at the [Monaco Yacht Show](#) in September.
