

## Admiral launches Impero 38RPH superyacht Tremenda

28 April 2016 by Sam Ross

[Admiral](#) has launched its third superyacht of the year, Impero 38RPH [Tremenda](#), at its shipyard in Marina di Carrara.

The 38 metre superyacht is part of the Impero series and follows Admiral's launches of [Quinta Essentia](#) and [Ouranos](#) in the last month.

With an aluminium hull and superstructure, *Tremenda* can reach a top speed of over 20 knots. A shallow draft allows her to cruise in low depths, making her ideal for Caribbean cruises, a specific request from the owner when the project was started.

With its military appearance she is a hefty, masculine and modern looking superyacht that keeps in line with the rest of the Impero range. *Tremenda* is the third superyacht of the series after [Cacos V](#) was delivered in 2013 and [NONO](#) in 2014.

She features exterior design by [Luca Dini](#) and interior work by [Gian Marco Campanino](#) and [Admiral Centro Stile](#).

*Tremenda* has several social areas outside, including the huge sundeck, the bow lounge and the spacious beach club. Her beach club allows access to the full beam garage, featuring a side opening hullport for hauling and launching the main tender. Going forward there is access to the engine room through the engine control room, which for a yacht this size is a uncommon.

Access to the raised bridge is via the pantry on the main deck, which provides great views and guarantees perfect manoeuvring when under way and during docking operations.

From the raised pilot house it is also possible to get to the sundeck, where the second wheel is stationed, thanks to an internal staircase.

With an eye kept on the marine aspect theme, the interior design features dark joinery throughout and is alternated by rare marble panels and natural leather surfaces.

Surrounded by glass, the main saloon is flooded with natural light and creates the feeling of a continuous space with the aft cockpit. Heading forward, the main dining area is located and is again surrounded by glass and has impressive headroom.

The interior layout features one full beam master suite on the main deck with a marvellous full beam bathroom. The whole suite offers sea views from each angle, thanks to the side seascape windows. On the lower deck the four guest cabins, two VIPs and two doubles, each have ensuite bathrooms.

*Tremenda* will be used by the owner and his family on a private basis, starting in the Mediterranean and then in the Caribbean and US waters.
