

## Admiral Yachts' 38m Tremenda makes a splash in Italy

In a month's time Admiral has launched the 55m [Quinta Essentia](#) and the 50m [Ouranos](#). Now the Italian Sea Group has announced that the 38m [Tremenda](#) hit the water.

With an aluminum hull and superstructure, the vessel features exterior design by Luca Dini and interior work by Gian Marco Campanino and Admiral Centro Stile. Tremenda represents the third yacht in the successful Impero series, following [Cacos V](#) delivered in 2013 and Nono in 2014.

Her amenities include the huge sundeck, the bow lounge and the spacious beach club. The latter allows access to the full beam garage and has side opening hull port for hauling and launching of the main tender. Going forward there is the access to the engine room, through engine control room, usually not common for yachts of this size.

The main saloon is probably the most impressive area on board. Surrounded by glass, it is flooded with natural light, creating the feeling of a continuous space with the aft cockpit.

Tremenda's interiors feature one full beam master suite, located forward on the main deck with a full-beam bathroom. On the lower deck the four guest cabins, two VIPs and two doubles can be found.

Providing a top speed of 20 knots, the yacht will be used by the owner and his family on a private basis, starting in the Mediterranean and then in the Caribbean and US waters.
