*Marina di Carrara, 24th March 2016*

At the Italian Sea Group shipyard everything is ready for the launch of the outstanding 55 hybrid yacht called “Quinta Essentia”. The yacht has already been loaded on the trolleys and moved onto the floating barge, ready for the launch which will take place today.

It is the biggest yacht ever built by Admiral Yachts, until the 75 m currently under construction at the shipyard in Marina di Carrara will be launched in 2018.

“Quinta Essentia” was built for a very experienced Owner, who owned many worldwide renowned yachts in the past. Admiral is therefore proud to announce the build and launch of such an innovative yacht with hi-tech features which allow the yacht to get a low environmental impact in comparison with other similar yachts of the same size boasting traditional propulsion.

Admiral E Motion 55 is indeed provided with an advanced hybrid propulsion system which integrates two traditional engines with two electric motors, also connected to variable speed generators. The system also boasts a traditional transmission with two shafts. The entire propulsion system and the whole build technique guarantee the most silent, safest and incredibly efficient navigation on board this new superb yacht.

#### **About Italian Sea Group:**

**The Italian Sea Group** is nowadays one of the greatest conglomerates groups in the world's boating industry. Managed by entrepreneur Giovanni Costantino, the Group operates with several brands, **Admiral**, **Admiral Sail**, **Tecnomar**, featuring luxury sail and motor yachts; **NCA** and **NCA Refit**, featuring hi-tech shipbuilding production and refitting services for yachts over 60 m. The shipyard covers an area of 100,000 sqm and features several important facilities such as 11 sheds, 2,000 m docks, 200 m drydock, and a total lifting capacity of 1,000 tons.
