

Launched Ouranos, the 50m Admiral “C Force”

Second launch of the year for Admiral Yachts and The Italian Sea Group. Friday April 1st, was launched **Ouranos**.

Built for a repeat Client and christened '**Ouranos**', the **Admiral “C Force”** 50 meter is finally on the water delivering a new and innovative “touch” in her range. She is an outstanding yacht and this is clear from the first second you see her. The **Admiral C Force 50 ‘Ouranos’** is just the perfect balance between tradition and innovation, between classic and marine lines, and modern and advanced design, not to talk about the high specifications she has been built to.

The yacht features a full displacement hull, with steel and aluminium construction, while delivering a maximum speed of 17 knots, which makes her one of the fastest displacement yachts of this size.

The whole interior has been designed by Arch. **Gian Marco Campanino** together with the **Admiral Centro Stile**, resulting in a pleasing mixture of natural leather and refined joinery throughout the yacht; an interior which perfectly reflects the requests and the expectations of very demanding and highly expert Owner.

Arch. **Gian Marco Campanino** comments about the interiors: *"I guess that M/Y Ouranos interiors express the contemporary lifestyle state-of-the-art without being overcharged of iper-decoration;*

"Less is More" is still current. Without giving up high-end finishings, this yacht establishes a new luxury idea, made of purity and linearity; sophisticated atmospheres, subtle color shades make of this interiors something very cozy although definitely luxurious; precious materials and outstanding artpieces speak for themselves; without being a glitzy boat, she best represents the new ideal of elegance".

The yacht is provided with a large master suite, placed forward on the main deck and completed by a **private office**, a walking wardrobe and a huge master bathroom. The whole ambience is flooded with natural light, also thanks to the ten vertical and full headroom windows on both sides of the cabin.

On the lower deck, served by a glass & steel elevator which connects all the three decks, five large guest cabins find place, three of which are **VIPs**, while the other two are twins with sliding beds (to make them doubles) and Pullman beds too. The common spaces are further completed by two big salons, one on the main deck, where also the main dining area is located, and one on the upper deck, almost taking the full beam of the yacht and also featuring a cinema corner and a bar.

The **Admiral 'Ouranos'** will be crusing the Med in summer and will be then displayed at the **Monaco Yacht Show** in September 2016, just before crossing the Atlantic to spend the winter in the Caribbean.
